No need to worry any more...
*...your passwords*
are kept safe!

"TK8 Safe" – Easy-to-use, secure password manager

Product Info

★ TK8 Safe is a perfect password manager with features to cover all aspects of storing and using sensitive information.

If you have passwords, then TK8 Safe will make your life easier.

Highlights

★ • Easy to understand and fast user interface

• All your data is encrypted with strong 448 bit BlowFish security algoritm

• Quick search, grouping, filtering and unlimited sorting options.

• Auto fill command to enter login information (user names and passwords) automatically

• You can run the program directly from removable media (like USB drives).

Manage Your Passwords

★ You can keep all user names, passwords, secret notes and serial numbers in one secured database file. The file is encrypted and not available to anyone else.

It means no more lost passwords and headache remembering them. No more fears strangers can see or use your information. It's safe and simple!

TK8 Safe password manager not only stores your information but helps you use it. A fast and easy-to-use interface allows you to find information quickly. You can also use folders in your files to group the information.

Searching, sorting and finding passwords has never been easier.

Easy To Work With

★ Log in to password protected web pages automatically! Just select "Autofill" from the menu or press a hot key when you are at the login prompt. The program will locate the required entry automatically and fills the login prompt for you. It works with all browsers and programs that are asking passwords.

If needed, you can also launch web pages or files related to password entries and use classic Copy and Paste commands.

Secure

★ The password file can be locked if you leave the room, so the information remains always protected. Even if you forget to lock the file, the program will do this automatically after unused for some time.

Advanced Options

Advanced users have many options and additional features like multi-user support to work with one file at the same time, additional information panel designed for System administrators and automatic password backups. By using hot keys you can call different TK8 Safe commands whatever other program is active, built in password generator is useful for creating new secure passwords, etc.

System Tray Mode

If you like, you can use the program in the system tray mode. In this way no room is taken away from your taskbar. And you can still access all the features easily by clicking on the tray icon (next to the Windows system clock).

Portable

The program is also portable, which means you can run it directly from any removable media like USB memory discs. So you can carry the entire program and your passwords in your pocket; knowing only you can access the information.

Help & Support

Help file and manual are included with the program so you could get to know all the features and benefits TK8 Safe can offer. If you should have any questions, our fast customer support team is always ready to help you.
